

Oncology Advisory Committee

September 8, 2022

MEDITECH

Our Mission

The ONCAC mission is to **advance oncology informatics** throughout healthcare organizations and to **enhance safety and efficiency of oncology practices**. The ONCAC committee members will serve as subject matter experts and provide guidance, recommendations, and conceptualization on Oncology Best Practices through the use of MEDITECH software and provide feedback for the future design of the Oncology application.

Revenue/OCM/EOM & CCM Billing

Scott Godbout, Product Manager

Oncology Care Model Participants (OCM)

- OCM - Advanced Alternative Payment Model
 - Voluntary Participation (2014 - 2022)
 - Enhanced Services payment (\$160/month/patient)
 - Catch-all code for all coordination activities (HCPCS G9678)
 - Participants could not bill for certain Care Coordination activities
- Program Successor: Enhancing Oncology Model (EOM) begins 2023
 - Recent customer task survey
 - Decision making factors for participation

Chronic Condition Management & Complex CCM

- Services provided by clinical staff and directed by a physician
- Billed based on time spent with patients since 2014
 - 99490 (\$64.02) - 1st 20 minutes of clinical staff time, per calendar month
 - 99439 (\$48.15) - Each additional clinical staff time, per calendar month
 - 99491 (\$86.17) - For billing practitioner only/No clinical Staff time
 - 99437 (61.25) - **NEW** in 2021 as one of 5 new **Principal Care Management CPT codes**
- Complex CCM (lasting 12 months according to time spent)
 - 99487 - Complex CCM (\$134.27)
 - 99489 - Additional Care Coordination (\$70.60)

Principal Care Management

Principal Care Management

- Beginning CY 2020, we introduced Principal Care Management (PCM) services to furnish CCM for patients with a single chronic condition or with multiple chronic conditions but focused on a **single** high-risk condition
- PCM services may be expected to last 6 months–1 year or until patient's death
 - PCM services require 30 minutes before billing
- CCM codes require patients have 2 or more chronic conditions expected to last 12 months or until their death
 - CCM services require 20 minutes before billing

Chronic Care Management & Principal Care Management Codes

In 2021, we added 5 new CPT codes describing PCM services furnished by clinical staff under the supervision of a NPP.

Challenges with CCM

- Patient eligibility & participant management
- Tracking time spent with patients who meet criteria
 - Manual (spreadsheets)
 - Resetting the time clock each monthly period
- Dropping charges when minutes threshold has been reached

Expanse Ambulatory/Care Compass CCM tools

- Built into Expanse for time tracking
- Registries can automatically accrue and track eligibility
- Windows Toast Notifications

The Oncology Transition - 2.1 to 2.2

Michael Ricardi, Supervisor

The Oncology Transition - Current State

- Early Adopters of the 2.2 platform are going really well
 - Currently implementing 13 sites
 - These sites do vary in terms of current state platform, but the majority are going from Expanse 2.1 to Expanse 2.2
- Diverse Organizations
 - Smaller practices
 - Multi-facility organizations
 - Meditech as a Service (MaaS)
 - Prior Ambulatory experience

The Oncology Transition - On-Boarding Lessons

- Web Ambulatory Lift
 - Early engagement is key
 - Secure your AMB resources for assistance
 - This is certainly the bigger lift
 - Cutover of Provider Appointments
 - Converting Documentation Templates to AMB
 - Revenue Cycle Considerations
 - Integrated Webinars from MEDITECH
 - Front Office/Scheduling
 - Revenue Cycle

The Oncology Transition - On-Boarding Lessons

- Recurring Accounts Discussion
 - Sites are adopting both a lifetime/30 day auto discharge approach to handling RCR accounts
 - Engagement early on with Revenue Cycle is key
 - If auto discharge, awareness of the following:
 - Reset of PCS Worklist Items
 - Blood Bank Cross/Match Implications
 - Non Oncology Orders to Discontinue (outside of a treatment plan)

The Oncology Transition - What to Expect

- Re-Implementation of Oncology
 - Assigned a MEDITECH resource from IMP
- Training of New Features
 - Patient Care Status Board
 - Ambulatory Launch
 - TNM Staging & Survivorship
- Integrated Support (aforementioned webinars)
- On-site LIVE Support

Development Corner

Nate Mettelle, Manager Development

A photograph of medical professionals in a clinical setting, with one person pointing at a tablet held by another. The image is overlaid with a teal gradient.

Oncology Development Roadmap

Complete

- Staging Integration with Pathology / mTuitive
- Inpatient Chemo Administration Improvements
- Evaluate PHA Site at Time of Order Broadcast
- Staging Details on Problem List Overlay
- New Oncology Downtime Report

In Process

- Genomics Integration and Decision Support
- **Accommodate Problem Status Changes for Treatment Plans**
- Accommodate Edits to AMB Meds outside of Oncology

Upcoming

- eClaims interface in Ontario
- Enable e-Prescribing for AMB Meds in Treatment Plans

Determining

- Oncology Ordering in Web
- Order in one Location, Administer in a different Location (orders across facilities)
- Oncology Data Integration with Business & Clinical Analytics

Problem Status Edits and Oncology Treatment Plans

Michelle Mullings Spurr, Lead Software Designer

Problem Status Edits and Oncology Treatment Plans

- CLIN-223833 (Expanse 2.1 and 2.2)
 - ONC indicator added to patient problem description when linked to active treatment plan
 - History & Problems tab
 - Problems & History overlay
 - Discharge Reconcile Problems overlay
