

MEDITECH's 2014/2015 Edition Combination Certified MPM and AMB Product Listings on ONC Certified Health IT Product List (CHPL)

When selecting your EHR from the [Certified Health IT Product List \(CHPL\)](#) website to generate a CMS EHR Certification ID, there are many options to choose from. MEDITECH has provided the below guidance for Eligible Clinicians (ECs)/Eligible Professionals (EPs) to help you locate and understand which products/components to choose for successful attestation. Please note, you must fill your cart to complete your EHR requirements and generate a CMS EHR Certification ID. If your organization is attesting for both Acute (EHs/CAHs) and Ambulatory (ECs/EPs), your organization will need to obtain two separate certification IDs.

Your organization must fill your cart to complete the EHR requirements and generate a CMS EHR Certification ID. By choosing the CHPL listing options to obtain your CMS EHR Certification ID, you are attesting that your organization actually possesses each of the components selected.

If you are using more than one certified version during the same reporting period (e.g. LIVE with 6.15 for a portion of the period and Expanse for the rest), you must add all certified products for both releases to the cart to generate the CMS EHR Certification ID. This step is very important, since in the event of an Audit, the CMS EHR Certification ID is what defines the different certified components that were possessed.

Below are the steps to assist in identifying the correct certified products on the ONC-CHPL:

- Utilize Filters on the CHPL site to identify the listings specific to your product and release.
- Select the appropriate certified products for objective measures.
- Select your 2015 Edition certified HISP
- If using another vendor reporting, select the appropriate certified products for your other vendor objective and quality reporting.

CHPL Website

The first step to generating a Certification ID is to navigate to the CHPL website. In the web browser address bar, enter the address chpl.healthit.gov. This document will walk through how to generate your CMS Certification ID using the CHPL website. Please note that there are currently some issues that users are experiencing on this website fairly consistently. These include searches for certain products which sometimes yield no results (despite those modules being certified), and, if a user does multiple searches, the cache can sometimes become backed up. If you are unable to get your expected results on CHPL, we recommend that you first try clearing your cache.

Clearing Your Cache

To clear your cache, select History within your internet browser and Click on . Exit and quit all browser windows and reopen your browser. If you're still experiencing issues with CHPL, please open a ticket with your specialist and they will work with you to ensure that your EHR Certification ID is generated successfully.

Selecting Certified Product(s)

Navigate to the middle of the CHPL homepage and locate the Search Bar. To search by vendor, type

Within the [View Practice Type](#) link under , you are presented with another drop down menu. Here, you may select  to assist in selecting the ambulatory-only listings. We recommend searching by Product Name as well to locate additional product listings, as some additional listings may be filtered out by narrowing the search to either 'Ambulatory' or 'Inpatient'.

There are several filtering options available on the CHPL website; these can be found along the top of the page. These options can be very helpful in narrowing your search and include options such as the .

2014 and 2015 both default in as selected, which is correct for generating a combination CMS certification ID.

Once you have filtered your search, the page displays your search results. Select the yellow  button to the right of the product(s) you want to add to the CMS ID Creator widget.

2014 Edition Certified Product Listings

1. Using the filters defined on the previous page, find and select the appropriate ambulatory listing that applies to your platform and version number. These listings are as follows:

- MEDITECH Medical and Practice Management (MPM) MAGIC v5.6.6
- MEDITECH Medical and Practice Management (MPM) Client/Server v5.6.7

- MEDITECH Medical and Practice Management (MPM) v6.08
- MEDITECH 6.15 Web Ambulatory EHR-All CQMs v6.15
- MEDITECH Ambulatory EHR v6.16

2. After selecting the appropriate listing above, you will select the MEDITECH or Other Vendor product used for each of the following:

- Continuity of Care (CCD) Interface Suite
- Public Health: Immunizations
- Public Health: Syndromic Surveillance
- Cancer Case Reporting
- Patient and Consumer Health Portal (PHM)

2015 Edition Certified Product Listings

1. Using the filters defined on the previous page, find and select the appropriate ambulatory listing that applies to your platform and version number. These listings are as follows:

- MEDITECH MAGIC Medical and Practice Management (MPM) Electronic Health Record v5.67
- MEDITECH Client/Server Medical and Practice Management (MPM) Electronic Health Record v5.67
- MEDITECH 6.0 Medical and Practice Management (MPM) Electronic Health Record v6.08
- MEDITECH 6.1 Ambulatory Electronic Health Record v6.15
- MEDITECH 6.1 Ambulatory Electronic Health Record v6.16

2. After selecting the appropriate listing above, you will select the MEDITECH or Other Vendor product used for each of the following:

- Continuity of Care (CCD) Interface Suite
- Public Health: Immunizations
- Public Health: Syndromic Surveillance
- Cancer Case Reporting
- Patient and Consumer Health Portal (PHM)

Please note the following when searching on CHPL for the **2015 Edition** MEDITECH products:

- MEDITECH's CCD Interface and Public Health Interfaces are listed by version number *only* and not by platform. The certified versions for MEDITECH's CCD and Public Health Interfaces are as follows: 5.67 (use for MAGIC and Client/Server), 6.0 (use for 6.08), and 6.1 (use for 6.15 and Expanse). Utilize the filters outlined in this guide to locate the MEDITECH Interfaces.
- MEDITECH's Patient Portal is listed by version number *only* and not by platform. The 2015 Edition certified version for the Patient Portal is version 2.0 (use for all platforms & releases). Utilize the filters in this guide, but modify the "Version" filter to 2.0 in order to locate the MEDITECH Patient Portal.

Selecting Your 2015 Edition Certified HISP

Find and select your 2015 Edition certified other vendor HISP. Your HISP must be added to your cart in order to reach 100% for the Base Criteria and generate a Certification ID.

If you are having difficulty locating your HISP on CHPL, the following filters can be used to display a list of all 2015 Edition certified HISPs:

Under the heading of ***Certification Criteria**, checkmark 170.315 (h)(1): Direct Project and 170.315 (h)(2): Direct Project, Edge Protocol, and XDR/XDM

Make sure that the setting at the top of this filter is set to **Matching any**.

If you are having difficulty locating your certified other vendor HISP on the CHPL website, we recommend reaching out to your other vendor HISP for assistance.

CMS ID Creator Widget

The **CMS ID Creator** widget will drop down automatically and appear as products are added. As you add products to the widget by selecting the yellow **+ Cert ID** button, notice that the base and CQM criteria increase towards 100%.

Certified Product Details

If you want to compare several products, select the green **+ Compare** button to the right of each product. It is recommended that you limit your comparison to five or fewer products at a time for ease of viewing.

If you want to see additional information about a product before you choose it, select the blue **Details** button to the right of the product.

The blue **Details** button will bring you to a product result page that includes additional information about the certification of MPM/AMB products including: the Certifying Body, Versions, CHPL Certification ID and our ambulatory designation. Also, note that if any additional software is required to meet the CEHRT criteria with the product, it will be listed on this page as well.

Developer and Product Review

Be sure to review the **Developer** name on the product before you select it. The Developer name should be “Medical Information Technology, Inc. (MEDITECH)” or in some instances on 2014 Edition listings, “LSS Data Systems”. We recommend whenever possible selecting the “Medical Information Technology, Inc. (MEDITECH)” MPM/AMB postings, as any MPM/AMB product listed with the “Medical Information Technology, Inc. (MEDITECH)” Developer name is the most appropriate certified product to select.

It is the responsibility of the clinician to select all certified products used during the reporting period. If you aren't sure if you own a certain module, please contact your sales or service specialist. The CMS ID Creator widget can be left open while you select all the products that you need. Be sure to review additional information, such as the Product Version number, which represents the MPM/AMB platform and release. For example, for both the 2014 and 2015 Editions, MPM/AMB has certified several platforms.

Adding a Complete EHR Product

If adding a Complete EHR product (available in the 2014 edition only) to the CMS ID Creator widget, please note that in order to choose a complete EHR, an organization must possess all items that were certified as part of the Complete EHR product.

First, look under the blue  button to the right of each product. Locate the products with 'Complete EHR' listed under 'Classification Type'. Note that all the complete listings for MPM and AMB are MEDITECH vendor products.

- MEDITECH Medical and Practice Management (MPM) MAGIC 5.6.6 (2014 CEHRT Ed.)
- MEDITECH Medical and Practice Management (MPM) Client/Server 5.6.7 (2014 CEHRT Ed.)
- MEDITECH Medical and Practice Management (MPM) 6.08 (2014 CEHRT Ed.)
- MEDITECH 6.15 Web Ambulatory EHR-All CQMs (2014 CEHRT Ed.)
- MEDITECH Ambulatory EHR 6.16 (2014 CEHRT Ed.)

These listings are complete but do not include optional CEHRT criteria for the Cancer Case Registries interface. If you also possess this interface, make sure to add the modular listing for this interface.

Adding Your Certified Product(s)

Once the correct product(s) have been identified, you can select the yellow  button at the top of the detail page.

CMS ID Creator Widget

At this point, you will see the CMS ID Creator widget drop down and display (if you have the minimum set of products which would allow you to generate a CMS Certification ID).

In this widget, if you chose the Complete product, you will notice the Base Criteria is at 100%, CQM Domains are 100%, and the Ambulatory CQM's are also at 100%, indicating that a CMS EHR Certification ID can be generated.

At the bottom of the CMS ID Creator widget, there is a yellow button labeled

Select the  button and you will see text added to the bottom of the CMS ID Creator widget.

This added text is the Certification ID that is needed when you are attesting to MIPS and/or Medicaid Meaningful Use, as well as for electronic Clinical Quality Measure submission.

You have the option to download the CMS certification ID as a PDF from the CMS ID Creator widget.

We recommend recording this ID by downloading, saving, and printing the PDF for your records prior to closing out of the widget.

In Addition

While selecting your products, you are able to view your selected products real time as they compile in the CMS ID Creator widget. This not an accurate determination of whether you have selected all of the CEHRT products which were used during your performance period, but rather, it will ensure that you at least meet the base requirement for generating a CMS EHR Certification ID. You are responsible for accurately selecting Core and Menu products possessed by the clinician.

Continue selecting products until you have accurately chosen all products used during the attestation period. Even after you have selected products that were used during the attestation period, note that the Base Criteria bar, CQM Domains bar, and the Ambulatory CQM's may not be displaying 100%. If it does not display 100%, then you will not be able to click on the yellow  button. If this is the case, select additional products that your organization has licensed, until all the base requirements are fulfilled and you are able to generate your certification ID.

Questions?

A [video tutorial](#) that walks through the steps of generating an MPM CMS EHR Certification ID using CHPL is available from MEDITECH as well. If you have further questions, please select the CHPL Resources tab for steps and instructions on the CHPL website, contact your MPM or AMB Specialist, or send an [email](#) to MEDITECH's Regulatory Mailbox.
