Regulatory Reporting Programs
Informational Guide

This informational guide provides a list of regulatory programs on MEDITECH's radar that are associated with federal and state regulations, along with additional programs brought to our attention by customer inquiries. Many of these programs we support - such as the Centers for Medicare & Medicaid Services (CMS) Promoting Interoperability (PI) Program and the Quality Payment Program (QPP) - and we noted the applicable resources and relevant comments in the table below.

For programs we do not support, we offer recommended resources to help you navigate compliance. You can also explore assistance from third-party vendors.

Table Of Contents

Note: This information is based on what we know today and is subject to change. This document will continue to be updated with any new programs and/or requirements.

U.S Regulatory Program Or Regulation	Resources *	Comments
