AMBULATORY

EXPAND YOUR VIEW — AND YOUR POSSIBILITIES

AT MEDITECH, WE BELIEVE THAT:

- **Every physician** should have an innovative EHR and practice management solution that their clinicians and staff actually enjoy using.

- **Every patient** should have positive, productive encounters with their care team.

- **Every practice** should have integrated and efficient scheduling, communication, and revenue cycle management tools.

Expanse Ambulatory combines the most intuitive, usable, and customizable EHR available to physicians today with MEDITECH's powerful practice management platform, providing ambulatory practices with everything they need to operate at peak efficiency and profitability.

TABLE OF CONTENTS

COMPREHENSIVE SOLUTIONS FOR BETTER RESULTS

Intuitive for providers

Expanse is the most intuitive EHR ever built, lowering clinicians' cognitive load and reducing the factors that can lead to burnout.

Clinicians can see the full patient story and provide better quality care through the seamless exchange of clinical data, orders, and results across care settings with Traverse, MEDITECH's interoperability solution.

Convenient for patients

Patients today look for more than just outstanding care — they expect convenience and digital sophistication.

Expanse Ambulatory provides patient-facing tools that deliver convenient access to care, secure communication, and online resources like self scheduling, contactless check in, bill pay, and integration with Health Records on iPhone ®.

Profitable for practices

Practices need to operate at peak efficiency while providing personalized quality care that patients will come back for, visit after visit.

Expanse Ambulatory's interactive scheduling grid, clinically driven charge capture, and prioritized business office worklists keep clinic volumes high and AR days low. Referral management and quality dashboards support quality care and value-based reimbursement.

"

Almost everything I need to write my note, to write my orders is there, and in those cases where something isn't there I'm about one click or maybe two away. I don't have to close what I'm doing. I can go look at something and come right back to where I was... I think that really shows that physicians have been greatly involved in the development of this product.

Stephen Tingley, MD, Chief Medical Information Officer, Mount Nittany Health

GET BACK TO PRACTICING MEDICINE

Personalized, flexible, and familiar tools

Stop spending more than half your work day interacting with the EHR and put your focus where it belongs — on your patients.

With its mobile, flexible, and intuitive design, Expanse Ambulatory won't slow you down or get between you and your patients. They'll be happier. You'll be happier.

Tap and swipe navigation using intuitive mobile device conventions

Streamlined documentation, chart review, ordering, and prescribing

Actionable insights to help clinicians adjust their workflows and personalize their EHR experience

"

I love the MEDITECH platform. I use a mobile device for pretty much everything I do, and I really like the layout. It's appealing to the eye and it makes sense. The touch screen makes it more natural documenting and interacting with the software.

Jeffrey Schleich,
MD, Family Practice Physician, FHN

ENGAGE PATIENTS IN THEIR CARE

Technology that empowers and connects consumers

Care doesn't just take place in the clinician's office, which is why Expanse Ambulatory offers additional tools to keep patients connected and engaged in their care between visits.

Give your patients tools that make it easy to schedule appointments, communicate with their care providers, and access their health information, with MyHeathHub and the MHealth app.

By offering Virtual Care (including care on demand), you can provide a convenient, modern option for patients to stay within their trusted care network.

With Expanse Patient Connect, you can deploy automated bidirectional communications with your patients via SMS and secure messaging.

COORDINATE THE RIGHT CARE BETWEEN VISITS

Integrated tools to guide patients through their care journey

Take patient support to the next level, providing an integrated solution tailored to the role of care managers with Expanse Care Compass. Through integration with Expanse Ambulatory, the power of your enterprise-wide EHR is leveraged to provide actionable, real-time data.

Expanse Care Compass centralizes patient information on a consolidated home screen, making it easier to direct services and ensure effective communication with patients and among caregivers and providers across care settings.

· Patient registries help organizations identify the patient groupings that might benefit from specialized outreach and services.

· Care Managers can better understand social determinants of health and other factors that may impact a patient's health.

· Organizations can establish goals, prioritize patient care planning, and ensure that patients receive the right treatment in the right setting for the right reason.

EXPANSE ACROSS THE ENTERPRISE

Integrated care in every setting

For enterprise organizations, using Expanse across all care settings allows you to reap additional benefits from MEDITECH's industry-leading integration:

One Record
Share patient data with physician practices, hospitals and acute facilities, home care, long term care, and beyond

One Schedule
Manage provider appointments, rounding schedules, meetings and more

One Bill
Encounters anywhere in the enterprise are combined into one patient-friendly statement

> "
> MEDITECH Expanse enables us to adopt best practices and workflows across our organization as well as access new tools around patient engagement, analytics, quality, and supply chain. Achieving Most Wired Level 8 was a collaborative effort, and I am confident that we will continue to move the needle forward with Expanse.

Billy Helmandollar, CIO, DCH Health System

THE POWER OF
ONE

A single EHR across all care settings ensures that you will get the complete picture of health for all your patients. With Expanse, your providers have access to data from across your entire network — including acute facilities, other practices, specialty clinics, long-term care facilities, and beyond. Staff manage one schedule that combines appointments from all settings, all in one central location. And patients benefit from a single patient bill and online access via one patient portal.

A MODERN, MOBILE AMBULATORY EHR

Expanse Ambulatory is a true ambulatory EHR

Not an acute EHR repackaged for the practice. We designed Expanse Ambulatory alongside practicing physicians, nurses, and clinic staff, focusing on their unique workflows. The result is a fully mobile, web-based ambulatory solution that's as easy to use as your favorite apps.

Expanse offers tap-and-swipe and AI-powered voice navigation so you can access patient charts, order tests, refill prescriptions, and more — just like you'd navigate any other touch- and voice-enabled device. With specialty-specific workflows, templates, content, and evidence, you'll have out-of-the-box features you can use on day one. And you can personalize the system with your own widgets and favorites to see everything the way you want.

Plus, with High Availability SnapShot, your clinicians can access patient records on their mobile device, even during unplanned downtime events.

GET THE MOST OUT OF EXPANSE AMBULATORY

Clinical EHR

- Enhanced mobility
- Touchscreen navigation
- Personalized homescreens
- Favorites & widgets
