

# Now Supporting Health Records on iPhone®

We are pleased to provide you with access to your health information through Health Records on iPhone.

**Use this secure connection to:**

- Access updated medications, allergies, vital signs, procedures, lab results, conditions, and immunizations captured across our facilities, alongside health records from other participating healthcare providers.
- Review health records alongside the latest health data from iPhone and Apple Watch, as well as compatible devices and apps.
- Share select health data with your providers through a new Sharing tab, to offer them a more holistic view of your health and wellness. (Available with iOS 15)

## Enrollment is simple:

Access the Health app on your iPhone > Select "Health Records" > Choose "Get Started"> Select this facility> Sign on with the same credentials you use for the patient portal.

**Don't have a patient portal? Ask us how you can sign up.**
