

MEDITECH

Expanse Point of Care

Keep your patients safe, even when you're on the move.

MEDITECH's Expanse Point of Care solution empowers nurses, LPNs, therapists, aides, and other clinicians to engage with patients and still keep up with their workload — all using a smartphone or handheld mobile device that's as convenient and user-friendly as their own smartphone. Clinicians can achieve more in less time with modern technology that untethers them from cumbersome workstations on wheels, and gives them more face-to-face time with their patients.

What does it include?

Mobile patient lists

Ability to scan, verify, and administer medications

Functionality to manage workloads in real-time

Patient safety info in the palm of your hand

More flexible, quick documentation

Uncluttered, user-friendly navigation

What does it do for clinicians?

Expanse Point of Care enables nurses and therapists to:

Engage patients with more face-to-face time

Get critical patient alerts on-the-go

Interact with patient information no matter where they are.

Save time and increase productivity by documenting faster at the bedside

Park their WOWs and use modern smartphone functionality they are familiar with

What do clinicians think of it?

Expanse Point of Care technology has generated more excitement than any nursing product to date! We're confident it will solve our current logistical challenges and introduce new efficiencies for bedside providers, while still helping us to maintain the highest patient safety standards.

Joe Farr, RN, Clinical Applications Coordinator, King's Daughters Medical Center (Brookhaven, MS)

How does it work?

Respiratory therapist Joe accesses his patient's chart by simply scanning his patient's wristband.

Joe uses mobile barcode scanning to scan the patient's medication.

He documents care administered and educates the patient on their medication.

Joe puts his mobile Point of Care device back in his pocket, and is good-to-go!

How can I learn more?

Explore our refreshed Nurse/Therapy digital campaign for more information.
