MEDITECH
Expanse Patient Care

Hi! My name is Kristen, and I'm a nurse.

Follow me as I grab my mobile device and sign into **MEDITECH's Expanse Patient Care**.

1 I only have to sign in once my entire shift, and I can accomplish everything I need to on a mobile device.

WOW!

2 The hand-off routine is where I get started. Here, the off-going nurse and I review each patient.

3 A patient needs pain medication. I take a smartphone out of my pocket and scan the patient's wristband and medication, ensuring a safe administration.

4 MEDITECH's mobile solution allows me to tiptoe into the room and administer the medication. There's no need to disturb the other patient with a noisy WOW.

5 I bump into Dr. Graham, who's on her rounds. She has a question about a patient, so I bring up the chart. It has the same look and feel as her physician software—we collaborate easily.

6 My shift is almost over. Before hand-off, I review my patients on the home screen. It's organized and easy to navigate.

7 I love caring for people. MEDITECH Expanse gives me time back to spend with my patients - educating, problem solving and collaborating.

Plus, I'm leaving on time!
