## MEDITECH's Home Care Mobile Solution

With MEDITECH's Home Care Mobile, providers can deliver quality care even when they're on the move. Field staff need only a standard web browser to access their schedules and view patient charts on their smartphones, tablets, or other mobile devices. Real-time information like patient diagnoses, procedures, medications, allergies, phone numbers, and emergency contacts is immediately available. They can also document travel and employee activity.

MEDITECH's Home Care Mobile also provides additional online documentation capabilities for aides, volunteers, and homemakers. They can quickly review and document in real time — directly from their mobile devices — thus maximizing patient face time, while drastically reducing the time they spend documenting retrospectively after hours.

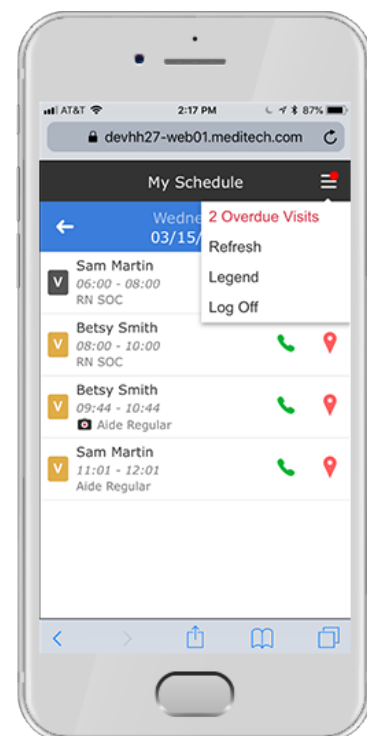

In areas where home care providers have limited access to WiFi or cellular signals, or where more in-depth clinician documentation is required, staff can continue to download the required patient records to their laptops, document offline, and later upload post-visit updates to MEDITECH's Home Care solution.

### Features of MEDITECH's Home Care Mobile include:

#### Ready Access to Patient Information

MEDITECH's Home Care Mobile provides clinicians on-the-go access to:

- Patient contact information, so they can quickly call a patient or physician, or view the location of an upcoming visit on a map
- Daily Home Care visits and activities with no synchronization required
- Patient medical profiles based on multidisciplinary patient care
- Aide, volunteer, and homemaker-specific care steps and procedure orders
- Current patient care plans based on discipline.

## Increased Accuracy

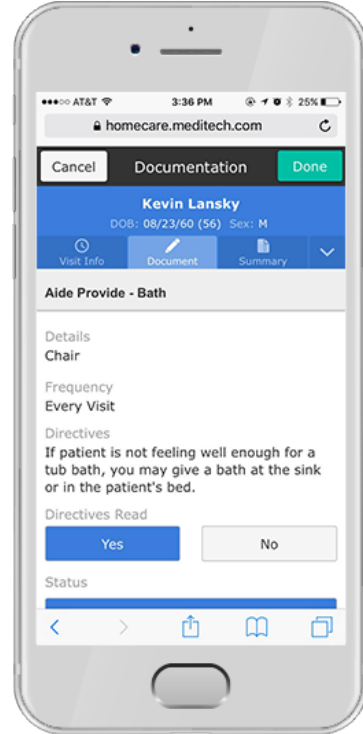

MEDITECH's Home Care Mobile increases accuracy of point-of-care documentation completed by aides, volunteers, and homemakers, by providing:

- Structured responses
- Integrity checks to ensure documentation completion
- Elimination of errors due to illegible writing or transcription errors
- Overdue visit notifications
- Reduced complexity of discipline-specific documentation tasks.

## Reduced Costs and Redundancies

Field staff now have all the information they need to reduce unnecessary costs and ease their workloads significantly. MEDITECH's mobile solution enables organizations to:

- Eliminate the need for costly transcription from the Aide Assignment Sheet into EHR
- Use their existing Expanse web infrastructure to minimize Home Care Mobile costs
- Eliminate the need to contract with third-party telephony interface vendors
- Implement Home Care Mobile via BYOD or Enterprise Smartphone (mobility) Management Systems.
- Use less expensive mobile devices for staff
- Reduce training for aides and contract PRN staff from weeks to days
- Add travel mileage on the go, eliminating paper.

MEDITECH's Home Care Mobile solution is available with Expanse. For more information, contact a MEDITECH Marketing Consultant.
