ORDER SET ANALYSIS

Examine order set utilization within your organization. The Order Set Analysis dashboard provides statistics and detail on how order sets are utilized. Determine which order sets haven't been used for a given time frame, or display your most used order sets. Get a breakdown of what order procedures are being used on an order set. Trend order set utilization over time by order set, order procedure, order provider, or order provider group.

With MEDITECH's personalized Order Set Analysis dashboard, users can:

- Identify and retire unused order sets.
- Trend order set utilization by a variety of breakdowns.
- Find underused order sets.
- Track initiatives to promote new order sets.
- Optimize order set build by eliminating unnecessary procedures.
- Analyze provider usage of order sets.
- Investigate non-set orders to determine need for new order sets.

KEY METRICS

- Order set utilization %
- Order set procedure usage %
- Order set count
- Order set procedure count
- Order count

DATA SOURCES

- EHR - Order Management

INTENDED AUDIENCE

- CNO

BENEFITS OF A PROFESSIONAL SERVICES BUSINESS AND CLINICAL ANALYTICS ENGAGEMENT

- Sophisticated data models that provide insight for organizational improvement.
- Personalized dataset and dashboard development.
- Dedicated assistance from SQL data engineers, dashboard developers, and subject matter experts.
- BCA ETL monitoring, user maintenance, and post-LIVE validation.
- Comprehensive training that educates your organization or a group of users on BCA.
- Education and knowledge transfer on data and dashboard content for future maintenance and success.
- Ability to layer services on top of quality initiatives, improvement projects, and efforts to reduce cost.

WHAT SETS US APART

Accessibility
We are MEDITECH and have full access to all resources.

Experience
We have seasoned professionals with industry knowledge and years of MEDITECH experience.

Product Knowledge
We know our system best.

Exclusivity
We perform services other firms cannot, such as reviewing internal code in your EHR and identifying data points.

Joint Project Management
We use collaborative tools to keep projects on track.

OUR OFFERING

MEDITECH's experienced subject matter experts possess a deep knowledge of electronic clinical quality improvement strategy and data sourcing. As part of this engagement, a SQL data engineer will provide analytics development and support to help you track outcomes. You'll receive rapid deployment of a BCA dataset and dashboard, as well as personalized training for navigating these tools to gain insights into the data.
