MEDICARE MIPS/PI REGULATORY SUPPORT SERVICES

Managing regulatory requirements and meeting quality standards is no simple task; it often requires extensive time commitment, considerable resource allocation, and comprehensive clinical adoption. Improve your regulatory processes and compliance with assistance from the MEDITECH Professional Services team. Our program is designed to cater to your exact regulatory needs for reporting on Medicare Merit-based Incentive Payment System (MIPS) and Promoting Interoperability (PI) measures — from configuration of MEDITECH's Quality Vantage (QV) tool for convenient monitoring and analysis of reporting numbers, to a review and update of regulatory content and nomenclature mapping for improved data integrity — we're committed to providing you with the help you need for successful attestation. Book an engagement now to get the most out of your regulatory data and submission.

OUR CORE OFFERING

QUALITY VANTAGE CONFIGURATION

We perform a comprehensive evaluation of Quality Vantage configuration and results to gauge readiness for attestation.

READINESS ASSESSMENT

We carry out a thorough assessment of system build and nomenclature mapping for MIPS/PI program measures to determine what actions are needed to get you ready for reporting.

MIPS/PI PREPARATION

We execute a personalized action plan for improved compliance, followed by knowledge transfer for maintained success.

MEDITECH

OUR APPROACH

Our MIPS/PI Consultants have a deep knowledge of the MEDITECH system and regulatory requirements. We'll use MEDITECH's Quality Vantage solution to inspect and interpret your data. With QV, we gain a better understanding of how to meet quality reporting goals and insight into ways to improve current reporting numbers. Improve your scores by identifying variations in care, drilling down to patient-level detail. We'll perform and educate staff on nomenclature mapping and regulatory best practices, and create a comprehensive inventory for sustained success.

OPTIONAL ADD-ON SERVICES

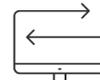

QV IMPLEMENTATION

Designed for customers who have not yet implemented QV, our team will do the groundwork in build and configuration so you can focus on monitoring performance, improving your score, and attesting with confidence. We'll also provide an educational review of tools and strategies needed to maintain QV.

HIE ASSESSMENT

Health information exchange (HIE) allows clinicians and patients to access and securely share vital medical information electronically. We'll review current adherence to HIE and PI objectives, and execute actions to help you achieve optimal performance with an interoperable system, improving the speed, quality, safety, and cost of patient care.

MIPS/PI MAINTENANCE

Each reporting year brings new changes to quality reporting and we want to make sure your reporting numbers stay consistent. We'll perform a review of previously reported measures in comparison with new regulatory changes and monitor progress with QV to keep your performance on track.

WHAT OUR CLIENTS ARE SAYING

“ Working with the Professional Services team has been great. Both their professionalism and knowledge of MEDITECH has been like a breath of fresh air. They get answers to problems quickly and are always willing to help if you need it. They know who to contact within MEDITECH and ask the right questions so we weren't having to wait. Also, the presentations and documentation are probably the best seen coming from MEDITECH. ”
