

## Implementation Services: Project Management and Analysis

Implementing an EHR can be an overwhelming initiative, unless you have a knowledgeable and trusted partner working on your behalf. MEDITECH Professional Services has a proven methodology, talented and tenured leaders, and an implementation project plan that makes it possible to achieve client goals and gain value from the investment.

---

### Revenue Cycle Analysis

MEDITECH Professional Services offers a full, on-site assessment of your Revenue Cycle, providing analytics to indicate all red flag indicators. Key indicators target areas for improvement, such as AR days, claim denial rates, medical coding, and cash collections. Guidance includes a proactive review of claims, including claim checks, accurate subscriber information, and proration rules to position your organization for optimal success.

### Supply Chain Analysis

After a full, on-site assessment of your Supply Chain, MEDITECH Professional Services will present several key indicators highlighting current successes and areas of opportunity within the department. These areas may include stockout reductions, increased inventory turn rates, item usage analysis, and improvements to operational workflow efficiencies. Item and stock masters are evaluated for accuracy, relevance, and unnecessary redundancy. Spend analysis, material handling costs, and maximized use of your supply chain systems are also evaluated to promote efficiencies and take advantage of available automation for optimal usage.

### Current/Future State Analysis

MEDITECH Professional Services offers full assessments to evaluate current state and future state preparation, identify areas for improvement, and recommend project planning. This service allows for an open dialogue with your organization, to determine whether a multiphase or single-phase implementation will further long-term strategic results. These newly designed processes are communicated to senior leadership and can be used as a roadmap throughout the implementation.

### Content Management

To complement our project team, MEDITECH Professional Services offers guidance for standard content to ensure it meets the strategic needs of your organization. Standard content such as treatment plans and assessments is targeted to ensure personalized components that achieve client goals.

## Data Decommissioning

MEDITECH Professional Services provides guidance on decommissioning legacy systems and evaluates the RIGHT data to bring forward. Our team works closely with third-party vendors to ensure a seamless transition. This process is designed to minimize risks along the way, while determining what data will add value to your organization in the future. Guidance includes strategies for adhering to all local, state, and federal requirements for regulatory compliance to data management.
