MEDITECH EXPANSE

CONNECTING COMMUNITIES
WITH TRAVERSE

Need to exchange data? MEDITECH has you covered. With Traverse, included in Expanse, we ensure you have all of the components you need in one bundle to exchange information the way you want. Follow the patient story wherever it leads, across health systems and care environments, and give both your physicians and your consumers a better experience. Here's how Traverse can get you there.

EHR-TO-EHR LINK

Your physicians can open other EHRs to view the patient's chart for a complete history of care. Features include:

- Shared sign on credentials
- Uninterrupted workflow
- Patient Record Smart Search
- Access to Expanse from other EHRs.

SHARE CLINICAL DATA

Clinicians see the full patient story with one personalized and consolidated view of clinical data from HIEs or other exchange networks embedded in their workflow, including:

✓ Personalized patient summaries

✓ Discharge summaries

✓ Referral notes

✓ Real-time notifications of out-of-network visits

✓ Discrete and actionable clinical data added to patient health record

- ▼ Medications & allergies
- ▼ Immunizations
- ▼ Problems

EXCHANGE CLINICAL ORDERS AND RESULTS

Receive and incorporate a variety of orders from physicians throughout your community, with results linking back to the originating EHR.

With a CommonWell Connected™ platform

HIE

CommonWell® Health Alliance
Connect beyond your local HIE and easily share data with thousands of physicians in the CommonWell national network.

Carequality
Extend your reach to all major EHR vendors with CommonWell's bridge to Carequality, from the practice across town to the academic medical center states away.

From local and regional connections, to enrollment in nationwide data exchange services, Traverse, available in Expanse, gives you the tools to navigate the interoperability landscape with ease.
