

## MEDITECH's ONC Health IT Certified Product Listings on the Certified Health IT Product List (CHPL)

### Eligible Hospitals (EHs) & Critical Access Hospitals (CAHs)

This document provides guidance for Eligible Hospitals (EHs) and Critical Access Hospitals (CAHs) on how to locate and understand which products and components to select when generating a CMS EHR Certification ID on the Certified Health IT Product List (CHPL) [website](#).

Please note, if your organization is attesting for both Acute Eligible Hospitals (EHs) and Critical Access Hospitals (CAHs) and Ambulatory and/or Oncology Eligible Clinicians (ECs), your organization will need to obtain **two separate certification IDs** - one for EH/CAHs and one for ECs.

*The CMS Electronic Health Record (EHR) Certification Identifiers (IDs) will be available through the Certified Health IT Product List (CHPL) beginning on September 1st. The IDs will reflect the 2026 CMS program reporting year with a year-based prefix of "2026C." Users who still need a 2025C ID for the 2025 reporting year will continue to be able to generate one through December 31, 2026. During this overlap period, the CHPL CMS ID Creator will allow users to select either the 2025 or 2026 reporting year when generating an ID. For more information, see the [CMS EHR Certification ID Quick Reference](#).*

Your organization must fill your cart to complete the Electronic Health Record (EHR) requirements and generate a CMS EHR Certification ID. By choosing the CHPL listing options to obtain your CMS EHR Certification ID, you are attesting that your organization possesses each of the components selected. When adding the components to the cart, keep the following in mind:

- If using more than one certified version during your reporting period (e.g., LIVE with 6x for a portion of the period and Expanse for the rest), you must add all certified products for both releases to the cart to generate the CMS EHR Certification ID.
- For CY 2026 reporting, you are required to use *ONC health IT certification criteria* certified products.
- A list of MEDITECH's certified products can be found on our [Certification page](#).
- In the event of an Audit, the CMS EHR Certification ID is what defines the different certified components that were possessed.

Below are the steps to assist in identifying the correct certified products on the ONC CHPL [website](#).

**Step 1:** Utilize Filters on the CHPL site to identify the listings specific to your product and release.

**Step 2:** Select the appropriate certified products — see guidance below.

**Step 3:** Select your ONC health IT certified Health Information Service Provider (HISP).

**Step 4:** If using another vendor reporting, select the appropriate certified products for your other vendor objective and quality reporting.

Step 1: Certified Health IT Product List (CHPL) Search Feature

A list of MEDITECH’s certified products can be found on our [Certification Page](#). As noted above, if more than one certified version was used during the same reporting period (e.g., you updated from one certified release to another during the reporting period), you must add products for both releases to your cart to generate your CMS EHR Certification ID. To generate a Certification ID, navigate to the [CHPL website](#).

*Note: CHPL has redesigned their website, so please review the information below on filter settings.*

In the search box, enter MEDITECH and select SEARCH.

The **FILTERS** option (3 dots) on the right allows you to filter by several categories, as shown below:

**FILTER BY:**

CERTIFICATION CRITERIA

CERTIFICATION DATE

CERTIFICATION STATUS

CLINICAL QUALITY MEASURES

COMPLIANCE

NON-CONFORMITIES

ONC-ACB

QUICK FILTERS

STANDARDS

[RESET ALL FILTERS](#)

**SELECT A FILTER TO BEGIN**

To narrow down your search results, choose a filter category from the left-hand panel. Then, select one or more filter options to apply to your search.

**FILTER BY:** Select **CERTIFICATION STATUS** and verify that only Active is checked off:

Step 2: Select Your Certified Product Listings

MEDITECH’s ONC health IT certified software product is certified as **Modular only** and does not have a Complete EHR listing. You will search for and select the Modular EHR listings a la carte, regardless of whether your organization has 100% MEDITECH products or if it has a combination of MEDITECH and other vendor products.

To obtain a Certification ID from CHPL, hospitals must have MEDITECH’s Core EHR. The Core HCIS includes:

- Admissions/Registration (ADM/REG), Health Information Management (HIM), Management Information Systems (MIS), Abstracting (ABS), Data Repository (DR), Pharmacy (PHA), Laboratory (LAB), Imaging and Therapeutic Services (ITS/IDM)/Radiology (RAD)/ Departmental (DPT), Electronic Medical Records (EMRT)/Patient Care Inquiry (PCI), Order Management (OM)/Order Entry (OE), Patient Care Patient Safety (PCS)/Nursing (NUR), Physician Care Manager (PCM) and e-Prescribing (ERX) w/ Dr First.

Please note, if you are using MEDITECH’s Traverse Exchange solution, there is no additional product specific to Traverse Exchange that needs to be added beyond including your HISP and your Core HCIS.

Last Reviewed - September 2026

3 of 5

1. Using the filters defined above, find and select the appropriate Core HCIS that applies to your version number. Here is a complete list of MEDITECH's Core HCISs as they appear in CHPL below.

- MEDITECH MAGIC Electronic Health Record Core HCIS v5.67c
- MEDITECH Client/Server Electronic Health Record Core HCIS v5.67c
- MEDITECH 6.0 Electronic Health Record Core HCIS v6.08c
- MEDITECH 6.1 Electronic Health Record Core HCIS v6.15c
- MEDITECH 2.1 Core HCIS v2.1c
- MEDITECH Expanse 2.2 Core HCIS v2.2c

To add the listing to your cart, select the CERT ID + icon next to the listing.

2. After selecting the appropriate Core HCIS, you will select the MEDITECH or Other Vendor product used for each of the following:

- Emergency Department Management (EDM)
- Continuity of Care (CCD) Interface Suite
- Public Health: Immunizations
- Public Health: Syndromic Surveillance
- Public Health: Electronic Reportable Laboratory Results
- Public Health: Electronic Case Reporting
- My Health Portal (PHM)

Please note the following when searching on CHPL for ONC health IT certified MEDITECH products:

- MEDITECH's EDM is listed by the version number that corresponds to your MEDITECH release
- MEDITECH's CCD Interface: The certified versions for MEDITECH's CCD are as follows: 5.67c (use for Magic and Client/Server), 6.0c (use for 6.08), and 6.1c (use for 6.15 & Expanse).
- MEDITECH's Patient Portal: The certified version for the MyHealth Portal is version 2.0c (used for all platforms & releases).
- MEDITECH's Public Health Interfaces: The certified versions for MEDITECH's Public Health Interfaces are as follows: 5.67 (use for Magic and Client/Server), 6.0 (use for 6.08), and 6.1 (use for 6.15 & Expanse). All Public Health Interfaces meet the ONC health IT certification criteria required.

To add the listing to your cart, select the CERT ID + icon next to the listing.

### Step 3: Select your Certified HISP

Back on the SEARCH option, find and select your ONC health IT certified other vendor HISP.

**Your HISP must be added to your cart to reach 100% for the Base Criteria and generate a Certification ID.**

If you are having difficulty locating your HISP on CHPL, the following filters can be used to display a list of all ONC health IT certified HISPs.

Under the heading of CERTIFICATION CRITERIA in the filters, checkmark "170.315 (h)(1) Direct Project" and "170.315 (h)(2) Direct Project, Edge Protocol, and XDR/XDM" in the Active column and select CLOSE.

Step 4: Electronic Clinical Quality Measure (eCQM) Reporting Products

MEDITECH offers certified SQL Reports for eCQM reporting. If you are using our SQL reports, MEDITECH’s Core HCIS product listings are inclusive of all eCQMs, so no additional selections need to be made. If you are using a third party for Quality Reporting, you will need to locate and select that vendor’s certified product listing.

CMS ID Creator Widget

The “CMS ID Creator” widget will drop down automatically and appear as products are added. As you add products to the widget by selecting the “CERT ID +” button, notice that the base and eCQM criteria increase towards 100%. Continue adding all product listings used during the performance period, even if the total has already reached 100%. **Please Note: To obtain 100% you need to add ALL items of software being used for attestation. This includes non-MEDITECH software, other vendors, and HISPs.**
